

LAVEN UNDERDECK™

CONTROL MODULE MANUAL

Hello from Haven

Haven Underdeck is your source for an all aluminium constructed underdeck ceiling system. We offer multiple options to fit any budget and design – making the space you envision a reality.

Our exclusive DIY Underdeck kits can be shipped nationwide. Pick from a number of different textures and patterns that can be mixed with your choice of over 25 different colors.

Our **patented do-it-yourself product line** is designed to transform the underside of your deck into a dry usable space perfect for entertaining. From our dimmable LED lighting products to our pest-free screen additions, we work with you to design the perfect patio area for your family to **enjoy year round**.

It gives us great pleasure to announce the release of the Haven Control Module. You may now manage all of your underdeck accessories from your screen, discover how to install and maintain your underdeck system, and examine color and texture options using images of your actual space.

Getting It Set Up

1. Ensure that the Haven Device is powered on by pressing the power button. A light should come on to confirm power to the device.

2. On your device, go to Settings, then Bluetooth and turn on Bluetooth capabilities.

3. Once Bluetooth is on, launch the Haven Control Module App and click on the Haven Control module button.

4. This will bring you to your accessories and you will be able to control them with the slide bars.
